

PUBLIC TRANSPARENCY REPORT **2025**

Letko, Brosseau & Associates Inc.

Generated 24-11-2025

About this report

PRI reporting is the largest global reporting project on responsible investment.

It was developed with investors, for investors. PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders. This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2025 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2025 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

SENIOR LEADERSHIP STATEMENT

SENIOR LEADERSHIP STATEMENT

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SLS 1	CORE	N/A	N/A	PUBLIC	Senior Leadership Statement	GENERAL

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

We engage in responsible investment because we are firm believers that sound business practices - including strong corporate governance and responsible management of material environmental and social issues - are essential for any business to succeed, while poor practices risk hindering the company's financial performance. Well-managed companies will address their material ESG issues through their strategy and are more likely, over the long term, to create value for their shareholders. As a long-term investor, understanding these ESG risks and identifying those companies with strong corporate governance structures in place to address these issues is critically important in evaluating each investment, including the determination of an appropriate price at which to acquire the stock, and thereafter actively managing the risk. Approach The firm's approach to responsible investment is one of in-depth research and engagement.

The firm's proprietary research provides us with a deep understanding of the companies in which we invest and the industries in which they operate. This level of understanding is critical in support of our longer-term investment horizon and developing a strategy for engaging with corporates on ESG matters. An evaluation of a company's financial statements can provide much information in terms of the risks, particularly financial, the company is facing. As example, sales growth which persistently lags industry growth or cash flow generation insufficient to support the company's debt burden and borrowing covenants may portend financial struggles and the risk of deterioration in the company's share price. However, not all material risks are addressed in the financial statements.

As example, how the company is preparing for the transition to a lower-carbon economy cannot be found in the financials. Similarly, as it relates to human rights, how the company is managing relationships with its employees and the local communities in which it operates is not found in the financial statements. Nor is the company's approach to monitoring respect for human rights in its supply chain. Our engagement program sees us actively engage with companies, those in our portfolios and those not. These discussions often include ESG-related topics in addition to financial matters and, through these discussions, we seek to influence these companies, often to provide greater disclosure and transparency. Our responsible investing approach looks for strong corporate governance at our investee companies, including in the areas of the environment and human rights.

While our engagement program seeks to reinforce this view, so too does our approach to proxy voting, which we view as one of the most important rights afforded shareholders. Each of our proxies is evaluated internally and voted in accordance with our proxy voting policy.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

The past year marked a pivotal step forward in our responsible investment journey, with a focus on foundational ESG enhancements designed to support the long-term integration of sustainability into our firm's strategy, governance, and investment processes. In 2024, we conducted our first firm-wide ESG self-assessment. This initiative represented a milestone in our commitment to ESG accountability and allowed us to critically evaluate our current performance across all areas of the organization. The findings from this assessment highlighted both our strengths and opportunities for growth and directly informed the identification of our priority ESG projects. These projects, aligned with both our internal goals and client expectations, formed the basis of a structured, long-term ESG action plan. A key achievement during the reporting year was the publication of our proxy voting summary 2023 on our corporate website.

By disclosing our voting rationale and outcomes, we have taken a significant step toward enhanced transparency and governance accountability. This initiative reinforces our alignment with our responsible investment principles and offers stakeholders a clearer view of how we exercise our stewardship responsibilities. Further strengthening our internal ESG capacity, we welcomed our first dedicated ESG analyst to the Investment Services team. This addition reflects our commitment to integrating ESG considerations into the decision-making processes. The ESG analyst plays a strategic role in supporting both ESG analysis and data management, as well as facilitating cross-functional ESG initiatives across the organization and with our stakeholders. In parallel, January 2024 saw the formal implementation of our Responsible Investment Policy.

This policy lays out the framework through which we assess material ESG risks and opportunities and guides our actions in managing the capital entrusted to us. It reflects our belief that responsible investment is essential not only to risk management but also to delivering long-term value to our clients. To support our evolving ESG strategy, we also undertook a redesign process of our internal research portal. The updated platform now provides improved tracking and measurement capabilities for ESG data and metrics, particularly with our engagements. This technical enhancement enables more precise data collection and analysis, helping us monitor progress, ensure consistency, and report more effectively on ESG outcomes.

The start of this upgrading process forms an essential part of our continuous improvement approach and helps embed ESG deeper into the research function. Taken together, these initiatives have materially strengthened our ESG foundation and enhanced our ability to deliver responsible investment outcomes. We are committed to be well-positioned to build on this progress and deepen our impact through stronger governance, greater transparency, and more effective ESG integration.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

As highlighted earlier in this Senior Leadership Statement, responsible investment remains a cornerstone of our long-term strategy. We believe that incorporating ESG considerations into our investment process enhances our ability to deliver sustainable outcomes for our clients, while also contributing to broader societal and environmental goals. Recognizing that continuous improvement is essential, we have identified the following priorities for 2025 and beyond: First, we will add ESG oversight to the Board's Charter, reinforcing our commitment at the highest level of governance and ensuring that ESG considerations are embedded into strategic decision-making. In 2025, we will conduct a comprehensive review of our existing ESG initiatives to evaluate their effectiveness and identify opportunities for further development. This will include an exploration of collaborative efforts with industry peers, aiming to drive collective progress on ESG practices and advance shared sustainability objectives. As part of our dedication to transparency and accountability, we aim to align our ESG annual report with globally recognized disclosure frameworks, such as the United Nations Sustainable Development Goals (UN SDGs) and the Sustainability Accounting Standards Board (SASB) standards.

This alignment will enhance the clarity, relevance, and comparability of our reporting, supporting our efforts to continuously improve in line with industry's best practices. We will also update our Engagement Policy to incorporate enhancements made to our research portal, which now allows for more effective tracking of engagement activities and outcomes. In addition, we plan to introduce an escalation policy to formalize our approach when company engagements do not progress as expected. In line with our environmental commitments, we plan to calculate and assess Scope 1 and Scope 2 emissions across our operations in 2025. This initiative is intended to provide us with a clearer understanding of our environmental footprint and help identify opportunities to reduce our carbon emissions. Finally, we acknowledge the importance of integrating Indigenous rights and perspectives into our ESG framework.

In 2025, we will continue to explore meaningful ways to recognize, respect, and engage with Indigenous communities. This includes fostering dialogue, enhancing awareness of Indigenous issues, and contributing to ongoing reconciliation efforts. These commitments reflect our ongoing efforts to integrate ESG principles into every aspect of our business, as we continue to evolve in pursuit of long-term, sustainable value for all stakeholders.

Section 4. Endorsement

'The Senior Leadership Statement has been prepared and/or reviewed by the undersigned and reflects our organisation-wide commitment and approach to responsible investment'.

Name

David Després

Position

Executive Vice President

Organisation's Name

Letko, Brosseau & Associates Inc.

○ A

'This endorsement applies only to the Senior Leadership Statement and should not be considered an endorsement of the information reported by the above-mentioned organisation in the various modules of the Reporting Framework.

The Senior Leadership Statement serves as a general overview of the above-mentioned organisation's responsible investment approach. The Senior Leadership Statement does not constitute advice and should not be relied upon as such. Further, it is not a substitute for the skill, judgement and experience of any third parties, their management, employees, advisors and/or clients when making investment and other business decisions'.

● B

The Senior Leadership Statement has been reviewed by David Després, Executive Vice President, and reflects Letko Brosseau's organization-wide commitment and approach to responsible investment. This endorsement is for the Senior Leadership Statement only and is not an endorsement of the information reported by Letko Brosseau in the various modules of the Reporting Framework. The Senior Leadership Statement is simply provided as a general overview of Letko Brosseau's responsible investment approach. The Senior Leadership Statement does not constitute advice and should not be relied upon as such, and is not a substitute for the skill, judgment and experience of any third parties, their management, employees, advisors and/or clients when making investment and other business decisions.

☐ (C) No, we did not publicly disclose details of our engagement with policy makers conducted as part of our responsible investment approach during the reporting year

CLIMATE CHANGE

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41	CORE	N/A	PGS 41.1	PUBLIC	Climate change	General

Has your organisation identified climate-related risks and opportunities affecting your investments?

☒ **(A) Yes, within our standard planning horizon**

Specify the risks and opportunities identified and your relevant standard planning horizon:

Supported by the work of our Climate Change Committee, we have examined the risks and opportunities presented by climate change and the ongoing global energy transition to many industries, including transportation (including airlines), autos, energy, utilities, mining, cement and coking coal. Factors that were assessed included direct physical changes caused by climate change, the pace of adoption of new technologies, changes in demand for key commodities and the effect of government subsidies and regulatory changes. While there may be risks within our usual investment horizon of five years, the most material impact to a particular industry is often likely to fall beyond our five-year horizon.

☐ (B) Yes, beyond our standard planning horizon

☐ (C) No, we have not identified climate-related risks and/or opportunities affecting our investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41.1	CORE	PGS 41	N/A	PUBLIC	Climate change	General

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

● **(A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities**

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

In our view, climate change and the ongoing global energy transition are likely to affect the global economy for decades to come. Therefore, the constant and ongoing evaluation of risks and opportunities and subsequent adaptation of investment strategy as the energy transition unfolds is necessary. The key pillars of our investment philosophy will remain consistent but our ongoing in-house research and industry expertise allows us to be informed and avoid areas of excessive risk or participate in areas of opportunity. We also actively engage with portfolio companies and encourage them to reduce emissions in line with the Paris Agreement in a meaningful and sustainable way.

- (B) No, our organisation has not yet integrated climate-related risks and opportunities into its investment strategy, financial planning and (if relevant) products

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle

Has your organisation assessed the resilience of its investment strategy in different climate scenarios, including one in which the average temperature rise is held to below 2 degrees Celsius (preferably to 1.5 degrees Celsius) above pre-industrial levels?

- ☐ (A) Yes, using the Inevitable Policy Response Forecast Policy Scenario (FPS) or Required Policy Scenario (RPS)
☐ (B) Yes, using the One Earth Climate Model scenario
☐ (C) Yes, using the International Energy Agency (IEA) Net Zero scenario
☒ **(D) Yes, using other scenarios**

Specify:

We conduct scenario analysis at an industry level. These scenarios are modeled around a range of likely pathways towards a net-zero world. These scenarios include, but are not limited to, direct physical changes caused by climate change, the pace of adoption of new technologies (such as electric vehicles), changes in demand for key commodities (such as copper and oil) and the effect of government subsidies and regulatory changes (such as carbon taxation).

- (E) No, we have not assessed the resilience of our investment strategy in different climate scenarios, including one that holds temperature rise to below 2 degrees

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 44	CORE	N/A	N/A	PUBLIC	Climate change	General

Does your organisation have a process to identify, assess, and manage the climate-related risks (potentially) affecting your investments?

- ☒ **(A) Yes, we have a process to identify and assess climate-related risks**

(1) Describe your process

We identify and assess climate-related risks at multiple points in our investment process:

- Our Climate Change Committee, comprised of a cross-section of our firm's portfolio managers and investment professionals, conducts climate change research. This entails examining potential global physical changes and how they may impact the macroeconomic environment, government policy, regulation, sector and industry dynamics. These findings are shared across our investment team.
- Our Investment analysts and portfolio managers, experts in their respective industries, also identify industry-level and company-level risks through their ongoing research, supplemented by conversations with companies.

(2) Describe how this process is integrated into your overall risk management

The findings of the research conducted by our Climate Change Committee and our investment analysts are regularly communicated to the investment team and portfolio managers. The risk assessment is directly integrated into the investment research process and informs our investment recommendations and portfolio construction.

☒ (B) Yes, we have a process to manage climate-related risks

(1) Describe your process

Climate-related risks are managed by conducting scenario analysis to identify areas of potential excess risk. As with any risk, we ensure there is adequate diversification within the portfolio to limit exposure to the particular risk. Through our active engagement with companies, we seek to understand their risk management strategies and energy transition plans and assess their viability and sustainability.

(2) Describe how this process is integrated into your overall risk management

The process is integrated through the close collaboration of our Climate Change Committee, investment analysts and portfolio managers in constructing and constantly evaluating our diversified portfolios.

- (C) No, we do not have any processes to identify, assess, or manage the climate-related risks affecting our investments
